PROJECTS

PAYNRENT-BOOKING SYSTEM (WEB APPLICATION)

Car rental web application during my learning with basic designs.

• Interactive & User-Friendly Interface to help users rent for cars services and as per their interest, they can search category wise, subcategory wise and brand wise whether it is a CNG, Diesel , Petrol, Electric or any cars service availability.

GitHub Repositories - <https://github.com/Annusodiya/payrents>

RESTAURANT TABLE BOOKING (WEB APPLICATION)

The project enables restaurants to order, create invoices, and share them with customers.

GitHub repository - <https://github.com/Annusodiya/restaurant>.

PAYNRENT—APP (REACT NATIVE APP)

•These apps typically offer a range of features to make the process of renting a car convenient and efficient. Some well-known car rental apps include.
